Ahmed Darhous

Executive Leader | MBA Candidate (AUC) | Corporate Security &
Risk Governance | AI-Driven Operations & Intelligence | Legal Expert
| Oil & Gas | HSE & Asset Protection
Cairo, Egypt

Summary

I don't just manage risk—I eliminate uncertainty. At the intersection of law enforcement discipline, legal authority, and AI-powered intelligence, I design and lead security ecosystems that protect people, assets, and mission-critical operations in high-stakes environments. With 9+ years as a Commissioned Police Officer within the Ministry of Interior, I've operated where decisions carry consequences. I've commanded crisis deployments exceeding 200 personnel, led sensitive investigations, and executed enterprise-level risk strategies under real-world pressure—where failure is not an option. Today, I bring that same operational mindset into corporate security, governance, and intelligence transformation. What makes my profile different is not experience alone—but integration:

- **Legal Authority** Advanced legal foundation with a Bachelor of Law & Police Sciences and dual postgraduate diplomas (Administrative Law – Lyon University, France; Egyptian Private Law). Currently finalizing a Master's thesis on Deepfake Crimes & Criminal Liability, addressing emerging threats at the intersection of law and AI. MBA candidate at The American University in Cairo (AUC), aligning legal frameworks with executive strategy.
- **Security & Operational Leadership** Track record in protecting critical assets, leading compliance frameworks, and ensuring governance at scale. Expert in crisis management, internal investigations, executive security coordination, and operational resilience across high-risk environments.
- **AI & Intelligence Engineering** Builder, not observer. Architect of Guardian-Nexus—an AI-integrated HR & Security ERP platform. Developer of OSINT intelligence systems and automated monitoring pipelines using Python, LLM frameworks (GPT, Claude, Gemini), and advanced prompt engineering.

Strategic Direction Focused on leading Risk Governance, Corporate Security, and Operational Intelligence functions within Tier-1 Energy, Oil & Gas, and critical infrastructure organizations globally. I operate with one principle: Security is no longer a function—it is a strategic

advantage.Languages: Arabic (Native) | English (C1) | French (DALF – Institut Français) Global Exposure: UK | France | UAE | Singapore | Malaysia Field Ready: Certified for harsh environments & off-road operationsIf you're building resilient, AI-driven security operations for the future of energy—let's connect.#OpenToWork #darhous

Experience

Government Security Organization (Egypt)

9 years 1 month

Executive Office Manager & Security Liaison

August 2025 - Present (1 year)

Cairo, Egypt

- Spearheaded C-Suite executive support operations, managing confidential governance workflows and inter-departmental intelligence coordination across multiple security directorates.
- Engineered streamlined reporting frameworks that reduced executive decision-cycle time by consolidating cross-functional security data into unified briefing documents.
- Directed confidential liaison protocols between senior government leadership and field operations, ensuring zero-breach information security across all classified communications.
- Architected Guardian-Nexus, a proprietary AI-integrated HR & Security ERP system, automating personnel tracking, threat assessment, and resource allocation for 200+ staff.
- Instituted AI-driven operational intelligence pipelines leveraging Python automation, LLM integration (GPT-4, Claude, Gemini), and OSINT monitoring to enhance real-time threat detection.

Commissioned Police Officer – Early Career

August 2017 - Present (9 years)

Cairo, Egypt

- Completed advanced Criminal Investigation certification at the General Security Institute (2018), ranking among top performers in forensic evidence handling and interview techniques.

- Executed frontline law enforcement duties including patrol operations, incident response, community engagement, and preliminary investigations across high-priority zones.
- Developed foundational expertise in Egyptian criminal law application, evidence chain-of-custody protocols, and inter-jurisdictional coordination.
- Supported senior officers in risk assessments, surveillance operations, and the preparation of legal case documentation for prosecution proceedings.

Commissioned Police Officer

July 2017 - Present (9 years 1 month)

Cairo, Egypt

Operations & Security Planning Lead

August 2023 - August 2025 (2 years 1 month)

Cairo, Egypt

- Orchestrated large-scale security deployments of 200+ personnel across multi-jurisdictional operations, delivering flawless execution during high-threat regional events and national security operations.
- Mitigated operational risk through data-driven resource optimization models, reducing response times and improving force-deployment efficiency across critical infrastructure zones.
- Developed comprehensive crisis response playbooks adopted as standard operating procedures across the regional command, enhancing organizational resilience and inter-agency coordination.
- Spearheaded real-time intelligence fusion initiatives integrating OSINT platforms, Telegram-based security alert systems, and AI-powered video/audio analysis pipelines.
- Managed logistical planning for sustained operations, overseeing supply chain coordination, resource allocation, and field infrastructure in remote and austere environments.

Senior Risk Mitigation & Investigation Officer

July 2018 - July 2023 (5 years 1 month)

Cairo, Egypt

- Conducted 150+ enterprise-level risk assessments and compliance audits, identifying systemic vulnerabilities and recommending corrective action plans that strengthened organizational integrity.
- Led complex internal investigations involving fraud, misconduct, and security breaches, producing court-admissible case files with a 95%+ prosecution-readiness rate.
- Pioneered the integration of digital forensics methodologies into traditional investigation workflows, reducing case resolution timelines and improving evidence integrity.
- Delivered training programs on investigative best practices, compliance standards, and risk awareness to cross-functional teams of 50+ officers.
- Collaborated with inter-agency task forces on high-profile cases involving financial crimes, narcotics, and organized criminal networks.
